Experience:

General Dentist

Nov 2014 – Jan 2017

Azeem Hospital, Multan, Pakistan

- Managed diagnostic patients independently as well as demonstrated about simple and complex restorative procedures to attending junior dentists.
- Treated patients with ultimate restorative procedures to avoid taking them to extraction and implant placement procedures.
- Managed general perio cases with scaling procedures and made them aware about perio problems and their root causes and maintaining hygiene in general.
- Assisted in major implant surgical procedures as well as apicectomy cases.
- Treated patients with general scaling and filling procedures independently.

General Dentist

Nov 2013 - Nov 2014

The Qureshi Dental centers, MQI, Pakistan

- Maintained records of patients alongwith radiographs.
- Managed scaling procedures independently and guided patients about oral hygiene.
- Worked closely with DIO, tatum, and got insight about flapless as well as mini and single step implant placement in edentulous patients.

House Officer (Dentistry)

June 2012 - June 2013

Nishtar Institute of Dentistry, Multan, Pakistan.

- Had 4-5 rotations in different departments over a span of 1 year.
- Managed general out-door patients in diagnostic department for a month.
- Managed perio-procedures in periodontology including scaling, root planning, debridement, curettage, gingivectomy etc.
- Assisted the HOD with the daily duties of giving demonstrations to students in prosthetic department besides managing night guards and partial & complete denture cases from impression taking to fabrication under supervisors.
- In surgery, used to prepare patients for major surgical procedures and also assisted residents with impactions besides managing minor extractions independently.
- Managed ortho-outdoor patients with impression taking, maintaining records with photographs & radiographs. Also, our duties included changing wires and placing temporary braces as well as bracket & ring placement in orthodontic cases.
- Used to present cephalogical cases alongwith calculations as part of the house job curriculum.
- In pedodontics, used to manage outdoor alongwith indoor cases including extractions, apexification, temporary fillings, etc.
- In endodontics, managed root canal procedures on single as well as multirooted teeth.
- In restorative, performed temporary fillings with ZnOE, Zinc Phosphate, GIC and permanent fillings with amalgam and composite.
