Professional Summary:

Internationally trained dentist with hands-on dental assisting experience gained during internship. Currently completing HARP certification at Dental Training Canada, enhancing expertise in radiography. Experienced as an orthodontic technician with clear aligner workflows. Eager to apply diverse dental knowledge and practical experience to contribute effectively as a Dental Assistant and continue learning in a clinical setting.

Education & Certifications:

HARP Certification (in progress)

Dental Training Canada, Toronto, Canada

Diploma of Primary Care Dentistry

Royal College of Surgeons Ireland (RCSI), Ireland (02/2023)

Bachelor of Science in Dental Surgery (BDS)

Jordan University of Science and Technology (09/2017 – 07/2022)

Infection Prevention & Control (IPAC) – Public Health Ontario (06/2025)

Work Experience:

Dental Orthodontic Technician

Orthodontics at The Wireworks, Toronto, Canada (08/2025 – 10/2025)

- Manage complete digital workflow for clear aligners, from case planning to delivery.
- Pour, trim, and scan dental impressions; digitize models using OrthoInsight for doctor-approved aligner plans.
- Fabricate clear aligners, retainers, and nightguards using thermoforming, 3D printing, and finishing techniques.
- Assist in orthodontic appliance fabrication (wraparound, Hawley, RPE, SPE, Hyrax) including wire bending, soldering, and acrylic finishing.
- Collaborate with supervising doctor on attachments, IPR, staging, and biomechanical considerations.
- Apply organizational skills to manage multiple tasks and ensure smooth workflow in a fast-paced clinical setting.
- Maintain consistency in quality control and treatment documentation.
- Utilize effective time management to meet deadlines for patient care and appliance delivery.

Clinical Evaluation Specialist – Orthodontic Clear Aligners

Eon Aligner, Amman, Jordan

(03/2025 – 06/2025)

- Reviewed clinical records, radiographs, and digital impressions to evaluate orthodontic cases, gaining hands-on proficiency with advanced digital dentistry workflows.
- Partnered with dentists and 3D design teams to validate tooth-movement plans, deepening expertise in anatomy and treatment planning and sharpening chairside communication skills.

Teaching Assistant – Dental Anatomy & Occlusion Course

Ibn Sina University for Medical Sciences, Amman, Jordan

(10/2024 – 03/2025)

- Directed the dental anatomy & occlusion lab, mentoring students and technicians through wax-ups while enforcing precise tooth morphology, occlusal accuracy, and strict safety/cross-infection measures (PPE, surface disinfection, flame-handling), achieving a zero-incident record.
- Streamlined lab workflows, instrument maintenance, and quality control, collaborating closely with faculty and support staff—honing the communication and team problem-solving skills essential in high-volume clinical settings.

General Dentist

Private dental clinics , Amman , Jordan

(08/2023 – 10/2024)

- Captured high-resolution intra-/extra-oral images and radiographs for treatment planning.
- Interpreted images to detect pathology, plan extractions, implants, and verify restorations.
- Educated patients chairside using visual aids to improve understanding and compliance.

Dental Assistant – Internship

Ministry of Health, As-Salt, Jordan

(08/2022 – 08/2023)

- Provided chairside support for restorative, surgical, endodontic, orthodontic, and pediatric procedures using four-handed dentistry techniques.
- Exposed, processed, and mounted digital X-rays and intraoral photographs (>98% diagnostic acceptability).
- Maintained sterilization protocols and aseptic techniques, ensuring compliance with Ontario standards.
- Assisted in root canals, surgical procedures, and orthodontic appointments; captured digital orthodontic records (>250 scans).
- Educated patients on oral hygiene, post-op care, and aligner compliance; achieved high patient satisfaction scores.

Technical Skills:

- Chairside Assistance: Four-handed dentistry, pediatric care, orthodontics
- Imaging: Digital and conventional X-rays, intraoral/external photography, 3D scanning
- Laboratory: Clear aligner fabrication, retainers, nightguards, orthodontic appliances
- Infection Control: Sterilization, aseptic technique, cross-infection prevention
